RNGesus, how have I wronged you so for thou divine punishment?. Really Good I love the Way there is roit and trade in this game. I wish you could move the supple drop becasue it ways in my way when I am building. Still a Fantstic game. Great tool for developing intuition about hyperbolic geometry. Takes place on a 7,6,6 tiled hyperbolic plane, rendered as a Poincaré disk with your character at the center. Alternate renderings including a (truncated to fit your monitor) half-plane and a partial embedding into 3-space are available for fun, though it's only really playable on the default Poincaré disk. Many different biomes are available to visit on your adventure, which make creative use of hyperbolic geometry and its unique curves and properties. Contains both easy challenges like fighting your way through hordes of hostile foes, and insanely difficult challenges like walking to the center of a circle or walking away from a spot and then returning to it.. No doubt one of my childhood favorites. Out of all the Indiana Jones games that's been made, this is the best of them.

Controls are a bit weird to get used to, just like back then.

The music is amazing and the hand-to-hand combat is quite satisfactory.

Thanks for finally adding this on Steam!. Well I think it is just one scenario, and pretty easy to win. The terrans and drengi fight each other more than you. I wish the regular campaign was more than 3 maps!. A very challenge mah jong game. Have to use take screen shoot then pause to pass the last level.. this strange thingy is really great.... good nuf said its aint eays but thats why you can download the map editor and make your own battles and make it fun. A good friend of mine sent me this game about a year ago, I played it early today out of boredom and with only 0.4 hours I am glad to say that I have become a being of another plane, the acting is triffled only by the acts of Bruce Cabot in the hit movie Fancy Pants, audio has this realxing sense of ease while also keeping you on the edge of your seat for whats to come, story is better than most Triple A games, and don't even get me started on how much connection there is between the player and the diverse cast; In conclusion, this game is a solid 9/10 for me, would suggest to casual and hardcore gamers alike. Absolutely positively fabulous!

This Game gave me AIDS. Brilliant visual story of one of H.P. Lovecraft's creepy tales, which I thoroughly enjoyed playing. It has been modernized so makes it just that bit more creepy too (nothing more creepy than emails being sent from your email address when you never wrote them). Unfortunately the resolution was small and so was awkward to read, however the dev is working on improving this.

-It is short (played in under 1 hour) but is something I would definitely come back to again.

-It has great use of music and sound effects that complemented the story.

-Simplistic design and great artwork help you visualise aspects of the story, whilst leaving enough to use your own imagination..

Really fun game! Worth the 5 bucks or 4 euros! Its not that fun if u play it alone, but with friends its fantastic!. I do not recommend this game because it costs money and the game ends Quickly about 3 hours of gameplay and once you get the torch you pretty much won the game.. The Shopkeeper sounded like an interesting little game for its price, but having played some of it I wish I had waited longer and read some of the user reviews. The game felt slightly broken, with scenes never really tying together correctly. You're merely dropped in with no explanation as to what's happening. Apart from that there was very little to do, and gameplay boiled down to an occasional clock clicking or skipping of dialogue that came up previously, which is far from the "point & click" gameplay they claimed to offer. While the art is nice the repetition of scenes wears thin very quickly. If you want to experience this game for the art style then just look at the screenshots above, as these were the only settings I encountered while playing through. All in all, I can't say I'd recommend this one. Worse still, with their comparison they have sullied the once proud name of Antiques Roadshow, which is frankly unforgivable.. The most frustrating part of this game is that the COMBO system has not been clearly explained, and many players have been lost. The more you play, the more skilled you are, the more interesting it is.. The ambient really gets you immersed in this game, It's simple but a very entertaining game. Awesome for a free game.

Como Argentino también tengo que decir que me llena de orgullo ver tan buen contenido creado en el país.. I liked FHM 4, but FHM 5 is a major improvement. I found it a bit too slow to go through the user interface and sim through days in FHM 4, but FHM 5 made it a lot smoother and quicker. Also, the additions of tactics and team chemistry is a nice addition.. Uggg.

Seriously, what a horrible experience. The whole time is like, what the hell am I supposed to be doing? Their basic moves, fine simple, I even got a few things done, but then you're just stuck wandering around hoping randomly clicking on things will do something. And there's no help out there. Walkthroughs or videos are non-existent, even here on steam. Just don't waste your time.
